

BladeUPS Preassembled System on pallet

Three module BladeUPS Preassembled System

Product Snapshot

Power Rating: 12 kW per UPS module up

to 60 kW N+1 per system

Input/Output 208V

Voltage: (400V available in future)

Frequency: 50/60 Hz

Features

• Factory pre-tested system accelerates installation and minimizes on-site testing requirements

- Save up to 20% in shipping costs
- Modularity and scalability allow the system to be easily moved
- Cost effective
- Quick and easy installation process

Designed specifically for high-density computing environments, the Eaton BladeUPS delivers 12 kW of efficient, reliable power in only 6U of standard rack space, including batteries. You can expand capacity by combining the 12 kW modules in a building block fashion, to deliver up to 60 kW of redundant power, from a single rack enclosure.

Eaton has expanded the BladeUPS product offering and simplified it for easy customization, shipping and installation. Introducing the Eaton BladeUPS Preassembled System, a truly turn-key solution for growing data center needs. Depending upon your power requirements, preassembled systems can be ordered with one to six BladeUPS units installed to provide the right level of power protection, while still providing for future growth. All you have to do is bring power to the unit and perform the simple start-up procedure.

The preassembled system is factory installed, tested and placed in a 42U rack. Eaton fully assembles the system, complete with communications cards and system wiring validation prior to shipping. The system is then delivered to you on a single, shock absorbent pallet.

Please note that extended battery modules and other BladeUPS accessories for these systems must be ordered separately.

Shipping Features

- Shock-absorbent pallet
- Specially-designed ramp included for easy on-site product placement
- Extra space on pallet for internal batteries to provide improved weight distribution for five and six module systems during shipping
- All product shipped as one unit resulting in lower cost and easier installation

Cost savings

BladeUPS Preassembled Systems are priced less than when ordering the standard system components and on-site installation service separately. When you order a preassembled unit you can save 7% on the overall cost of the product. Even more, since the preassembled unit is shipped on a single pallet, you can save up to 20% on shipping costs!

Preassembled System ready for shipment

Easy Installation

The preassembled system comes with all the UPS modules and communication cards already installed. For BladeUPS systems with five and six modules the internal batteries are shipped uninstalled for better weight distribution.

Unwrap the rack and easily roll it off of the pallet via a specially-designed ramp that is packaged with the unit. Once the rack is set in place, all you have to do is bring electricity to the unit and initiate the start up.
