

# Assembled in America

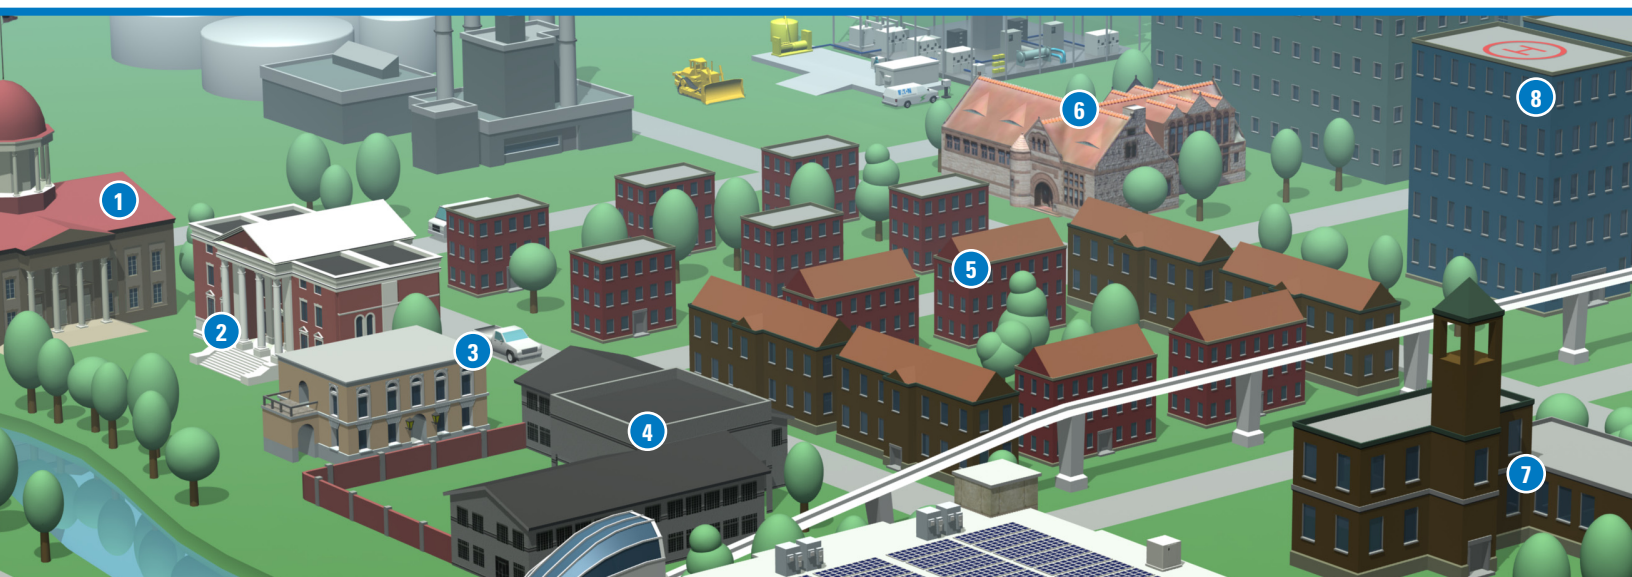

For decades Eaton has been manufacturing products in the United States and this year we are expanding our offering with new TAA compliant products. These new 'Assembled in the U.S.A' products offer a more robust line of TAA compliant UPS systems and further establish Eaton as an industry leader.

Our products are designed to be used in a wide range of public sector applications, including schools, courthouses, libraries and state facilities. By manufacturing products that are TAA\* compliant, we will better serve the public sector and its needs.

## Eaton's TAA Compliant UPS Product Public Sector Solutions

Public Facility	Product
1 Capitol Building	5115, 5130, 9130, 9155 & 9170+

8 Hospital	5115, 5130, 9390

*\*Please note this is just a sample of government facilities that Eaton's TAA compliant products can support.*

\*TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. - made or designated country end products. This act requires that contractors must certify that each end product meets the applicable requirements. End products are "those articles, materials and supplies to be acquired for public use." This includes items which have been "substantially transformed" in the United States.

Eaton Corporation is a diversified power management company with 2009 sales of \$11.9 billion. The Electrical Sector is responsible for nearly \$700 million in sales. Eaton's global electrical product lines provide customer-driven PowerChain Management® solutions to serve the power system needs of the data center, industrial, institutional, government, utility, commercial, residential and OEM markets worldwide. Eaton provides a comprehensive product offering with single-phase systems from 500 VA up to 45 kVA and three-phase systems up to 1.1 mVA. In addition, we also offer the broadest portfolio of rack-based distribution in the market, as well as an extensive software offering that can provide monitoring of an entire facility.
